

# WHAT BIRDS LIVE NEAR YOU?

Visit [tripleccamp.com/magazine](http://tripleccamp.com/magazine) for bird identification & facts!

## BIRD JOKE

Q: Why does a flamingo only lift one leg?  
A: If it lifted both legs it would fall over!

Color the bird

## Feed the Birds: Build a Bird Feeder

Materials: plastic container or can of any size, paint, paint brushes, stick, glue, bird seed, wide ribbon

1. Ask your adult if you can build a bird feeder!
2. Paint the container, get creative! How will your bird feeder look to the birds? Let the paint dry. While drying clean up your paint.
3. Tie a ribbon around your bird feeder, this is how you will hang it outside.
4. Glue the stick onto your bird feeder to be used as a perch.
5. Fill your bird feeder with bird seed. Hang it outside so you can see it from a place you like to sit. Enjoy watching the birds!
