

STAINED GLASS PAINTING

Visit tripleccamp.com/magazine for a step-by-step video

Materials: washable paint, wax paper, paint brushes, bottle lids, scissors, glue stick, cardstock, paper towel or small rag, glass of water

1. Check with your adult to make sure it's a good time for a messy project.
2. Carefully cut a square of wax paper.
3. Using a paint brush, dab paint over the entire sheet of wax paper. Make sure the paint is thick. The closer together the paint dots, the better for blending colors later.
4. Get a plastic lid (or several), different sizes or the same size works too.
5. Press and twist the flat side of the lids into the paint, blending the dots together. Wipe the lid against a piece of paper towel to clean it off every few dabs, this will prevent the dots from becoming too muddy.
6. Set your masterpiece aside to dry while you clean up your work space. Throw away/recycle any scraps and put away supplies. Clean your work surface.
7. Once the paint is dry, cut frames out of card stock and glue to the wax paper. With permission put them up on the window to share your art with the world.

Extensions: Try making a stained glass big enough to cover an entire window in your house!
